

A DewertOkin Technology Brand

Bedding. Be flexible.

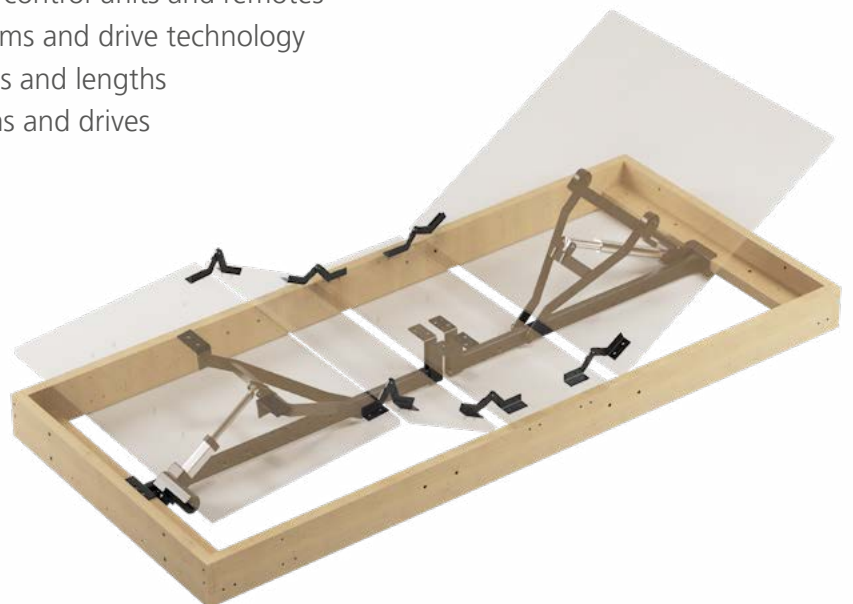

OKIN Bed Mechanism

Ideal for all standard box spring beds and platform beds: The OBM is the trend-setting, high-performance complete system with mechanics and drive sets for 1-motor or 2-motor systems. The OKIN system impresses with an extraordinary load capacity of up to 200 kg and is optimally suited for all common bed widths and lengths. Thanks to its simple installation and low installation height, the OBM offers a high degree of flexibility. Additional safety is provided by the convenient emergency lowering function thanks to the external power supply unit. Furthermore, the OBM is compatible with the wide product portfolio of OKIN control units and operating elements - You get everything from a single source!

CUSTOMER BENEFITS:

- Compatible with the wide range of OKIN control units and remotes
- Complete actuator system with mechanisms and drive technology
- Unique system fits all common bed widths and lengths
- Perfect compatibility between mechanisms and drives
- Load capability up to 200 kg
- Easy and quick to assemble

Bedding. Be flexible.
